FOR IMMEDIATE RELEASE

## **RURO Releases Limfinity® v6.5**

The latest version of Limfinity® includes enhanced database performance, additional search and import capabilities, and multiple flexible barcode label printing features.

**FREDERICK, Md.** (PRWEB) June 22, 2017 – RURO, Inc., a leading LIMS, RFID, and laboratory software solutions provider, announced the release of Limfinity® version 6.5, a content-packed update to the Limfinity® framework.

LimitLIS® and other RURO solutions based on the Limfinity® framework continue to gain a larger and more diverse base of customers among labs and other businesses. Limfinity® 6.5 adds new features and improvements requested by the Limfinity® user community, including improved performance for all supported databases, support for QR code generation, improved data import capability and API-based searching. These features improve the experience for both administrators and users.

“We can’t wait to get Limfinity® version 6.5 into the hands of our users,” says Vladimir Lebedev, RURO’s CEO. “The enhancements in the core areas of the framework will greatly improve the user experience for our administrator users!”

Key enhancements of Limfinity® version 6.5 include:

- Improved search performance for all supported databases
- Added support for QR code generation and printing
- Added support for printing of multiple barcode label rows per page
- New mailing address parser library
- Subject importer now passes BARCODE and RFID tags provided in import files to newly created subjects
- Additional permissions for searching subjects via API calls
- Multiple improvements to Limfinity® scripting capabilities
- More than 100 upgrades to system performance, including system searching

For a full list of features and improvements in Limfinity® version 6.5, please visit [ruro.com](http://ruro.com).

Additional information on the Limfinity® framework as well as the new Limfinity® Bricks can be found at [www.limfinity.io](http://www.limfinity.io). Both are now available for deployment.

All Limfinity® Cloud customers with active support subscriptions are eligible to upgrade to Limfinity® version 6.5, which is also available as a free download through each server-based Limfinity® installation's Virtual Machine (VM) console.

**About RURO, Inc.**

Founded in 2006, RURO specializes in Laboratory Information Management and RFID Solutions. RURO's Limfinity® is the informatics centerpiece in many of the world's leading translational science programs and biobanks. RURO's RFID Solutions meet critical inventory management, tracking, and security needs.
